

# The UC Davis Brewing Program

## Innovation and Education for the Global Brewing Industry

For over 60 years, UC Davis has brought together academic experts, industry leaders and talented students to refine the art and advance the science of malting and brewing.

The UC Davis Brewing Program is internationally recognized as the premier brewing research and education program in North America. Under the leadership of Dr. Michael Lewis, Dr. Charlie Bamforth, and now Dr. Glen Fox, our program has grown to serve all sectors of the brewing industry—with world-class expertise in malting and brewing, fermentation science, sensory science, chemistry, engineering, and more.

Our inclusive and equitable program prepares the next generation of diverse brewers for a global industry. Our cutting-edge equipment and facilities inspire students to greater creativity. And our collaborative partnerships help us imagine new possibilities.

### Our comprehensive program is guiding the future of brewing through:

- **Hands-on education** for current and future brewers
  - **Experienced professionals** learn through intensive courses including the world-renowned **Master Brewers Certificate Program**, a rigorous 15-week training program
  - **UC Davis undergraduate, master's and Ph.D. students** gain practical knowledge and skills, and conduct original research related to malting and brewing
- **State-of-the-art facilities** for teaching and research, as well as for use by industry members
- **Cutting-edge research and public outreach** that enables the beer industry to better understand and design products—and bring greater sustainability to processing

**As we look forward, our goal is to elevate the craft and science of brewing to even greater heights. Your philanthropic partnership will help prepare tomorrow's leaders and catalyze new discoveries that enrich every aspect of the brewing industry.**

# Innovation and Education for the Global Brewing Industry

## The Power of Partnerships

Philanthropic investment plays a vital role in ensuring that UC Davis continues to support the industry's expanding needs for highly skilled talent and innovative research. **With the partnership of industry, alumni and friends, we will redefine what brewing can achieve as a craft.**

*UC Davis is home to the Anheuser-Busch InBev Pilot Brewery—the world's first LEED Platinum-certified brewing facility—and the Sierra Nevada Brewing Co. Laboratory.*

## Philanthropic Opportunities

### *Invest in Our Students*

- **Create scholarships to increase equity and access** for Master Brewers Certificate Program students
- **Fund graduate student research and fellowships**
- **Support undergraduate scholarships**
- **Provide students with experiential learning opportunities** through paid internships, employment and other forms of partnership

### *Invest in Our Program*

- **Give the gift of flexible support** to bolster the program's areas of greatest need
- **Fuel groundbreaking research** in malting and brewing science

*We welcome cash gifts and pledges, as well as gifts of real property, including products, raw materials, equipment and other assets. You may also wish to provide permanent, sustainable support for any of these opportunities through a gift of \$50,000 or more to establish an endowment. We would be happy to work with you to realize your philanthropic vision and develop a gift plan that best meets your needs.*
